Experience

Signalor San Diego, CA
Founder & CTO Sep 2025 – Present

- Co-founded and built signalor.app, a **public-sentiment intelligence platform** for brands and investment firms.
- Designed and built the production system end to end: **Persistent headless scrapers** and crawling web agents, **SvelteKit**, **Bun/Express/Prisma**, and **TypeScript workers** on a **Kafka pipeline** (Avro, Schema Registry) for dedup, brand tagging, and **LLM inference** over **PostgreSQL** and **Redis**, with multi-tenant RBAC and **Stripe billing**.

Hypercubic (YC F25) San Francisco, CA
Member of Technical Staff intern Sep 2026 – Present

- Owned and developed complex **compiler architectures for COBOL**, designed a **High-level Intermediate Representation (HIR)** for major dialects of COBOL.
- Customized and sped up CI by **80x** via **Docker caching**, parallelized runners, and generated binary management.

IBM San Jose, CA
Software & DevOps Intern Jun 2026 – Sep 2026

- Worked across the AIOps/DevOps team on **watsonx Assistant for Z**; shipped crucial FINN features in Q2/Q3 2026 releases. **Recieved RO.**
- Output measured at over **6x a standard SWE intern's** on internal scoring system.

Climind Remote (San Francisco, CA)
Software & DevOps Intern May 2024 – Aug 2025

- Built and deployed **persistent web crawlers** collecting **ESG reporting and bond data** to feed the company's **LLM training pipeline**.
- Maintained and built containerized services with **Docker** and set up **CI/CD** for internal deployment.

Radians London, UK
Lead Developer Aug 2023 – Apr 2024

- Built and shipped the company's e-commerce site (**React, Node.js, MongoDB**) with email and VoIP support flows.

Projects

awesome-reverse-engineered github.com/alexgaoth/awesome-reverse-engineered

- Benchmarked and indexed 17,000+ open-source tools built by reverse engineering, with full integration of existing stacks; **1.2k stars, 220 forks on GitHub**.

Political Speech Classifier alexgaoth.com/projects

- Implemented an **encoder-only transformer** from raw matrix operations (attention, embeddings, training loop, no ML framework); **98.9%** agreement with allsides.com classifying US political speech by party.

Autonomous Swarm Intelligence devpost.com/software/outcast-virus

- **RL**-trained multi-agent navigation with camera-based **vSLAM** for drone and ground-vehicle swarms. Team-built in a weekend hackathon, winning **$4k**.

3D Julia Set Simulator intro.alexgaoth.com/JuliaSetFractal

- Pseudo-3D fractal renderer hand-built in Unity at 15; my love letter to Pure Math.

Awards

6x Hackathon Winner: DS3 x Bow Capital, SDxAnthropic, SDxVercel, IBM Bobathon, LAHacks 2025 – 2026
Gold Medal, British Informatics Olympiad 2025
Gold Medal, British Mathematical Olympiad Round 1 2024, 2025
Silver Medal, British Algorithmic Olympiad 2024

Education

University of California, San Diego GPA: 3.7 / 4.0
Bachelor of Science, Mathematics–Computer Science Expected Jun 2028

St Paul's School, London 2023 – 2025
A-Levels: Double Maths, Physics, Computer Science A*A*A*A

Skills

Languages: Python; Rust; C/C++; C#; SQL; Bash; Java; Javascript; Typescript.

Frameworks: Astro; React; Svelte/SvelteKit; Node.js; Express; Flask; Prisma; Unity; Godot.

Infrastructure: Kafka (Avro, Schema Registry); PostgreSQL; MySQL; MongoDB; Redis; BullMQ; Bun; Docker; Podman.
